

ARMOR-EDGE®

WITH JOINT-FILL STOP

providing a smooth transition for lift trucks, reducing maintenance costs for owners and call backs for contractors.

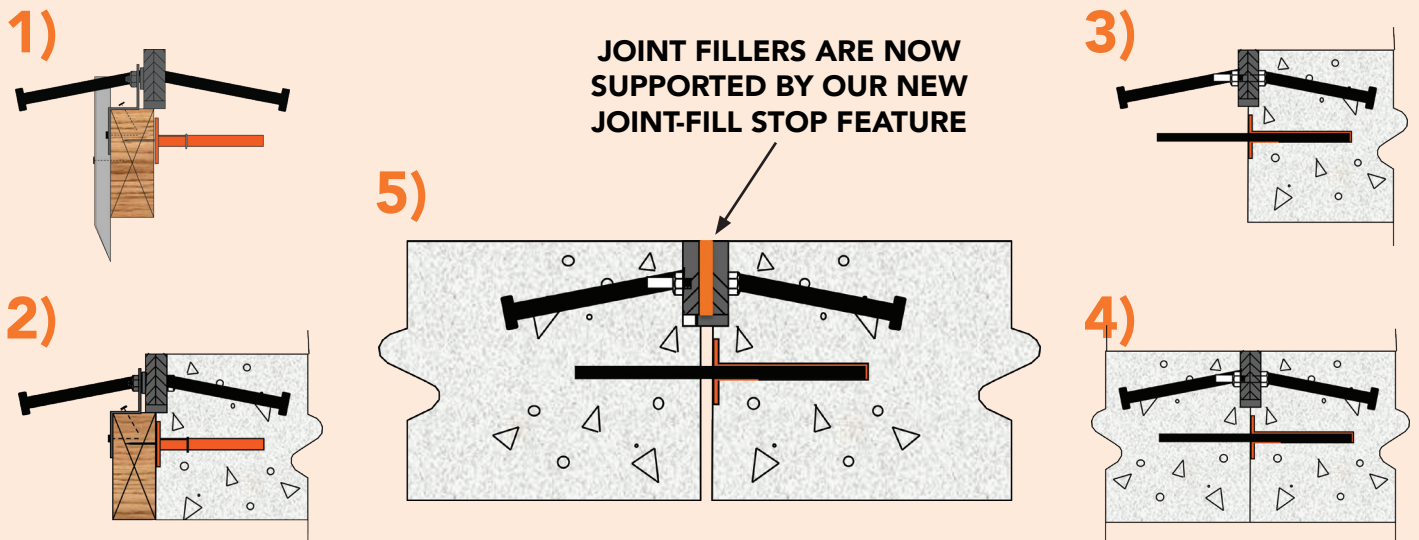

TAKE JOINT PROTECTION TO THE NEXT LEVEL

REDUCING EQUIPMENT MAINTENANCE COSTS FOR OWNERS/TENANTS

The newly designed Armor Edge with joint-fill stop is the new solution for "jointless" floor designs where the joints are opening wider. The joint-fill stop feature will reduce impact damage on wheels, thereby reducing lift truck maintenance costs, by enabling a smooth transition between slabs. Steel edge protects construction joints from spalling.

ELIMINATING THE NEED OF CALL BACKS FOR CONTRACTORS

With the joint-fill stop solution, joints are allowed to open up to 3/4" and still provide a completely smooth transition across the joints. This, along with the steel edge protection, will make your construction joints last longer and reduce future call backs.

ARMOR-EDGE®

WITH JOINT-FILL STOP

MANUFACTURED IN THE U.S.A.

With a plant on both coasts (Charlotte, NC and Bakersfield, CA) PNA is a short distance to your next jobsite.

MADE FOR WIDE CONSTRUCTION JOINTS

Like those found in the following concrete slab designs:

- High dosages of steel reinforcement
- High dosages of synthetic fibers
- Shrinkage - compensating
- Post-tensioned

The solution for "jointless" floor designs

**STRONG
JOINTS
WITHOUT
THE BUMP**

PNA has been helping to reduce floor maintenance costs by eliminating joint spalling for over 20 years with Armor-Edge. It has proved itself an ideal solution for construction joints in speed aisles, door thresholds, high-traffic areas, and freezer (cold storage) facilities.

Armor-Edge now comes standard with Joint-Fill Stop, providing a smooth transition for lift trucks across construction joints up to 3/4" wide, commonly found with "jointless" floor designs.

The Joint-Fill Stop provides shoulder support for semi-rigid joint-fillers and provides a totally smooth transition across joints.

This advancement in armored joint technology, when paired with the standard 3/8" cold-finished bar of steel protecting both joint edges, will significantly reduce lift truck maintenance costs for owners, and reduce call backs for contractors.

In addition to our Armor-Edge for wood forms, PNA's All-Steel Joint provides all the benefits of Armor-Edge with leave-in-place steel formwork. All-Steel Joint ships ready to install, complete with Diamond Dowels® for load transfer.

ORDERING INFORMATION

Part No.	Description	Qty/Ea	Unit of Measure	LF/Pallet	LF/Truck
AE3504X375X12	Armor-Edge v3.5 w/JFS and Z-Brackets - 12'	12	Linear Feet (LF)	780	9,360
N2E	Armor-Edge N2E 3/4" x 10" SD at 14.4" x 12"	12	Linear Feet (LF)	600
