

DELETE CRETE

CONCRETE DISSOLVER

DELETE CRETE IS A CONCRETE DE-BONDING AGENT THAT REVERSES THE MOLECULAR BONDING ACTION OF CEMENT AND TURNS IT BACK INTO A LOOSE MIX OF SAND AND AGGREGATE THAT IS EASILY RINSED AWAY. DELETE CRETE IS USED TO CLEAN CONCRETE TRUCKS, MIXERS, TOOLS, FORMS, SAWS AND FINISHING MACHINES, ETC. WITHOUT HIGH LABOR COSTS AND DAMAGING HAMMER AND CHISEL WORK.

PRODUCT HIGHLIGHTS

- **No harsh mineral acids:** Delete Crete is strong but gentle. It does not depend on muriatic acid to dissolve the concrete slowly from the top down with corrosive fumes.
- **Molecular action:** Delete Crete works through an organic complexing agent that literally de-constructs the molecular bond that holds the sand and aggregate together. The result is a loose mush that can be easily rinsed away.
- **Continues working:** Because Delete Crete has no volatile mineral acids, it does not evaporate or lose strength rapidly. It keeps on working until the entire mass of concrete is broken down and can be flushed off easily.
- **Safe:** Delete Crete is not corrosive to the skin and has no corrosive fumes to attack the lungs. It does not attack steel or aluminum.
- **Environmentally responsible:** The organic acid replacements and surfactants in Delete Crete are totally biodegradable and pose no hazard to the environment.
- **Economical:** Labor is the most expensive part of the clean up job. With Delete Crete labor is reduced to a minimum, thus saving money.
- **Available in 1 gallon and 5 gallon.**

USES

Delete Crete is used to remove concrete on trucks, mixers, tools, forms, saws and finishing machines, etc. without high labor costs and damaging hammer and chisel work.

**This product is not recommended for use to remove a layer of concrete from either an interior or exterior concrete floor or wall.*

QUICK LOOK:

Type :Complexing concrete cleaner, remover
Toxicity: Low - Harmful if swallowed
VOC's: None
Flammability: Non-flammable
Composition: Organic acidic complexing agents, biodegradable detergents and surfactants and inhibitors
Color: Pale yellow
Odor: Nil
Coverage:

**Coverage rates may vary depending on porosity, texture, application method and prior sealer application. Excess buildup should be avoided.*

DELETE CRETE

HOW TO USE:

Use Delete Crete full strength, do not dilute. Do not wet down concrete before applying. Do not apply to extremely hot surfaces. Do not apply to magnesium.

1. Spray on Delete Crete to thoroughly wet and saturate the concrete. Allow it to penetrate and soften the concrete. For heavy deposits, apply several sprays of Delete Crete. Do not let it dry.
2. Continue spraying and let it work for 20-30 minutes or until concrete is softened and can be removed easily by water spray.
3. For cleaning tools and parts, pour enough Delete Crete in a plastic bucket to cover the tools entirely. Soak tools until concrete is loosened.
4. Wash with water and dry.
5. Dispose of according to local, state and federal regulations.

PRECAUTIONARY STATEMENT:

Avoid breathing dust/fume/gas/mist/vapors/spray. Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Wear protective gloves/protective clothing/eye protection/face protection.

FIRST AID:

EYES: Flush thoroughly with water for 15 minutes, lifting both eyelids. If irritation persists, Get Medical Help.

IF SWALLOWED: Drink two glasses of water and Get Immediate Medical Help.

ON SKIN: Wash with water then soap and water. Rinse thoroughly. Remove and wash contaminated clothing before reuse.

INHALATION: Remove to fresh air until symptoms pass.

IN CASE OF FIRE:

Use foam, dry chemical, CO₂, sand or earth to extinguish.
